DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-35 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13, 15-27, 34, of U.S. Patent No. 6748636. Although the conflicting claims are not identical, they are not patentably distinct from each other.

Regarding claims 2-14, claims 2-14 are exactly the same as claims 2-13 and 34, respectively of Couillard '636.

Regarding method claims 15-21, the claimed methods are the obvious methods of assembling the apparatus of claims 1-7, 9.

Regarding claims 24-35, claims 24-35 are exactly the same as claims 16-27, respectively of Couillard '636.

Claim Objections

Claim 22 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schmidgall reveals a collapsible core for concrete pipe making apparatus. Gillespie shows a pneumatically-powered battering ram. Schmidt shows a rammer. Schultz reveals a vibratory concrete pipe forming apparatus and method. Freeman teaches a mobile reinforced concrete pipe machine. Osteen shows a construction moving positioning and molding tool. Marsh et al. teaches a device for forming and handling concrete pipe.
